## **Retrospective - Sprint 2**

At the end of Sprint 2, the team discussed the results of Sprint 2 in our team retrospective

Members of the team raised the following process improvement points:

1) Code Reviews/Pull Requests taking too long to clear

- Clear priority on reviews
- Tech lead and Scum Coach check for stalled requests

2) Continued improvement item from past retrospectives - using JIRA effectively...

- Self assign stories when picked up
- Tech lead and Scum Coach check for missing assignments regularly (daily) with active Stories/Defects
- Team move stories through JIRA and the physical board consistency

All parties agreed the team is interactive, raising questions and collaborating.

Sprint ritual process/events are kept on-track
