

PQVP Developer Onboarding List

Introduction

This list will be used for onboarding new developers in the PQVP project.

Developer List

- Get GitHub credentials for the ADPQ repository
- Request a HipChat invite.
- Operating System: CentOS 7.3.X. If your host OS is other than CentOS 7.3.X , install VirtualBox VM with CentOS 7.3.X
- Follow the README instructions in the GitHub repository (<https://github.com/CGI-Zahid/CGI-POC>) to set up the bootstrap framework for the application.
- To start developing, create a branch for your feature from the Integration branch. (See ADPQ Code Management Document)

For Assistance

Contact Roberto Obando (roberto.obando@cgi.com).
