Test Case Inventory Matrix (TCIM) - User Landing Page

Test Case ID	Test Case Name	Test Script ID	Test Script Description	Expected Result	Preconditions
1	List Events	1	Verify the User Landing page displays a list of Events for which the User has been notified with the first list item selected (for purposes of visualization).	User sees a list of events for which they have been notified, including the following data: Event Type, Message that was sent	User logs in
1	List Events	2	Verify a 'No Events Found' message displays when the User has not yet received any notifications.	User sees a 'No events found' message instead of a list of events.

For non-mobile users, the Map view should show the State of California | User logs in |
| 1 | List Events | 3 | Verify the More Info icon on an event, opens a Notification Details view with additional details about that specific event.

Non-Mobile User: Click Return to Map to go back to Event List + Map View.

Mobile User: Click Return to List to go back to Event List | User sees a Notification Details popover with additional details about the specific event with information including event type, source of event information, affected Zip codes, and actual message.

(Note: Number of notified users should NOT be displayed)

Non-Mobile User: Click Return to Map to go back to Event List + Map View.

Mobile User: Click Return to List to go back to Event List | User logs in |
| 2 | Map Events | 1 | Mobile Users Only: Verify the Map Pin icon on an event, opens a Map view illustrating where the event occurs for the selected event.

Click Return to List to go back to the Event List | Upon clicking the Map Pin, User is taken to a Map view.

Clicking Return to List takes user back to the Event List. | User logs in from their iPhone or Android |
| 2 | Map Events | 2 | Mobile Users Only: Verify the Map Pin icon on an event, opens a Map view illustrating where the event occurs for the selected event.

Click Back to go back to the Event List on the User Landing page. | Upon clicking the Map Pin, User is taken to a Map view.

Clicking Back takes user back to the Event List on the User Landing page. | User logs in from their iPhone or Android |
| 2 | Map Events | 3 | Verify User is able to zoom in and out of the map, and pan around. | User is able to zoom the map in and out and pan around. | User logs in

If User logs in from their iPhone or Android, they will need to click the Map Pin first |

Test Case Inventory Matrix (TCIM) - User Landing Page

Test Case ID	Test Case Name	Test Script ID	Test Script Description	Expected Result	Preconditions
2	Map Events	4	Verify User is able to select a different event and see the map refresh to the location of that new event.	User is able to see the map move from the first event to the location of the second event.	User logs in If User logs in from their iPhone or Android, they will need to click the Map Pin first
3	Navigation	1	Verify that clicking Logout logs the User out and navigates them to the Login page.	User is taken back to the Login page. Clicking Back does not take User back into the application.	User logs in
