Test Case Inventory Matrix (TCIM) - Admin User Landing Page

Test Case ID	Test Case Name	Test Script ID	Test Script Description	Expected Result	Preconditions
1	List and Filter Events	1	Verify the Admin User Landing page defaults the Event List to display "All Events" (unfiltered) with the first list item selected (for purposes of visualization).	Admin User sees a list of events with the following data: Event Type, Timestamp, affected zip codes (truncated w/ ellipsis if needed, More Info icon, icon, number of total recipients	Admin User logs in
1	List and Filter Events	2	Verify the Admin User can filter events by Event Types (e.g., Fire, Flood, Weather, Emergency, Non-Emergency, etc.)	Admin User only sees events for the selected Event Type.	Admin User logs in Clear other filters
1	List and Filter Events	3	Verify a 'No Events Found' message displays when the Admin User applies filters such that no events meet the specified criteria.	Admin User sees a 'No events found that match your criteria' message instead of a list of events.\n\nFor non-mobile users, the Map view should show the State of California	Admin User logs in
1	List and Filter Events	4	Verify the More Info icon on an event, opens a Notification Details view with additional details about that specific event and how many users were notified.\n\nNon-Mobile Users: Click Return to Map to go back to Event List + Map view.\n\nMobile Users: Click Return to List instead of Return to Map to go back to Event List	Admin User sees a Notification Details view instead of the map with additional details about the specific event with information including event type, source of event information, affected Zip codes, actual message, and number of users notified.\n\nNon-Mobile Users: Clicking Return to Map takes user back to the event list + map view.\n\nMobile Users: Click Return to List instead of Return to Map.	Admin User logs in
2	Map Events	1	Mobile Users Only: Verify the Map Pin icon on an event, opens a Map view illustrating where the event occurs for the selected event.\n\nClick Return to List to go back to the event list on the Admin Landing page.	Upon clicking the Map Pin, Admin User is taken to a Map view.\n\nClicking Return to List takes user back to the event list on the Admin Landing page.	Admin User logs in from their iPhone or Android

Test Case Inventory Matrix (TCIM) - Admin User Landing Page

Test Case ID	Test Case Name	Test Script ID	Test Script Description	Expected Result	Preconditions
2	Map Events	2	Mobile Users Only: Verify the Map Pin icon on an event, opens a Map view illustrating where the event occurs for the selected event. Click Back to go back to the event list on the Admin Landing page.	Upon clicking the Map Pin, Admin User is taken to a Map view. Clicking Back takes user back to the event list on the Admin Landing page.	Admin User logs in from their iPhone or Android
2	Map Events	3	Verify Admin User is able to zoom in and out of the map, and pan around.	Admin User is able to zoom the map in and out and pan around.	Admin User logs in If Admin User logs in from their iPhone or Android, they will need to click the Map Pin first.
2	Map Events	4	Verify Admin User is able to select a different event and see the map refresh to the location of that new event.	Admin User is able to see the map move from the first event to the location of the second event.	Admin User logs in If Admin User logs in from their iPhone or Android, they will need to click the Map Pin first.
3	Navigation	1	Verify that clicking Logout logs the Admin User out and navigates them to the Login page.	Admin User is taken back to the Login page. Clicking Back does not take Admin User back into the application.	Admin User logs in
